- 9) Thoughts Killed My Sleep
- 10) The Final 24
- 11) Eye

FORGOTTEN TEARS BIO.

Hailing from north of Italy (Milan), FORGOTTEN TEARS originally formed in 2005, and immediately they set very strict targets to hit: write awesome music and make as many gigs as possible. They immediately focused on live shows performances, getting the best of themselves every time and gaining a very positive feedback from the audience and the medias. During 2010 the band recorded the first full length album, called "Words To End", and shared the stage with many important bands like All Shall Perish, Bleeding Through, Aborted, Rotten Sound and Bleed From Within. "Words To End" is a 11-track opus that drives the listener through many different music influences, extreme and brutal parts, catchy riffs, technical solos, neck-breaking breakdowns and downtempos, passing through introspective and emotional parts as well. Fans of Unearth, Parkway Drive, All Shall Perish, Killswitch Engage, Darkest Hour, August Burns Red, In Flames, Soilwork, At The Gates (and many other bands of the modern melo-death & metalcore scene) will simply love it. "Words To End" wisely combines the best of the Modern European Death Metal scene and the newest American hardcore/metalcore/deathcore wave, it will be highly appreciated by both extreme metal fans and melodic metal fans, thanks also to its particular multifaceted influences.
